Collaboration with SubEthaEdit

Easy, Mac-based Network-Collaboration Text Editing

SubEthaEdit is a text editor application a basic word processor that permits collaboration on documents over a local, closed network.

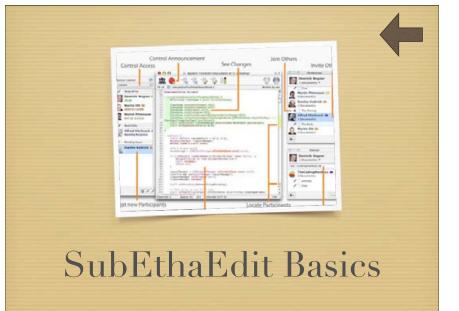

Users can see the same document, make changes simultaneously, and save a local version of the same document.

Teachers can use this technology to foster classroom and group discussions, virtual conversations, and worksheets.

Opened Access Control

First-Time Use

Teacher Tips

- ➤ Control the documents to be shared; do not let students share documents
- ➤ Do not enable read-write access for your shared documents; start with read-only
- ➤ Track students with the "follow" command

Everyone Tips

- ➤ Take the time to practice with this program first...
- ➤ A well-developed lesson will fall-apart if you jump-in cold students want to explore and figure it out
- Remember rules of netiquette behave appropriately and respect everyone's contributions of ideas

Ideas

- → Brainstorming
- ← Group WebQuests, Fact Hunts, and Worksheets
- \sim Foreign-language conversations
- \sim Summarization and Notetaking
